

Lab: Clean Up and Push Back to Remote Git

Objective

Understand how to clean up and push changes to a remote Git repository.

Commands

1. Verify whether master is in a clean state.
 - `$ git status`
 2. List all available branches.
 - `$ git branch -a`
 3. Pull the remote repository to the master branch.
 - `$ git checkout master`
 - `$ git pull origin master`
 4. Push the pending changes from "Git-T03-HOL_002" to the remote repository.
 - `$ git push origin master`
 5. Verify that the changes are reflected in the remote repository.
- `$ git log --oneline --graph --decorate`
